

Professional, Reliable, Quick  
Research Support Services  
at your Fingertips

**REQUEST JOURNEY**

# iResearch

## PLACING AN ORDER

Step 1: Click on the **Services** on the **Homepage**

The screenshot shows the iResearch homepage. At the top left is the iResearch logo. To its right is a navigation menu with links: 'My Requests', 'Services', 'About Us', 'Pricing', 'FAQs', and 'Contact Us'. A red arrow points to the 'Services' link. Further right is a user profile dropdown menu showing 'Abby Last' and a downward arrow. Below the navigation is a main heading: 'Professional, Reliable, Quick Research Support Services at your Fingertips.' Below this is a sub-heading: 'Select and customize your service. Top-grade writers will work on your order.' At the bottom left of this section is a blue button labeled 'Request Now'. On the right side of the page is a circular image showing a person's hands writing on a document with a pen.

Services

# iResearch

Step 2: Click on the “Order Service Now” button.

The screenshot shows the iResearch website interface. At the top left is the iResearch logo. The navigation menu includes 'My Requests', 'Services' (which is underlined), 'About Us', 'Pricing', 'FAQs', and 'Contact Us'. On the right, there is a user profile dropdown for 'Abby Last'. The main content area lists three services:

- Guidance for literature search for related scientific publication**  
Our expert researchers guide you in looking for scientific publications related to your research topic by searching several databases for hard to find studies or reports, and provide you with the relevant papers in the area of your interest published in high impact journals and other credible sources in the related field.
- Support in formulation of the informed consent**  
An informed consent form is an ethical and legal document that must be presented to study subjects before participating in the research. The aim of this document is to provide complete information regarding the study so that participants understand what the research is and what they are agreeing to participate in. Thus, formulating the informed consent requires careful selection of the information that needs to be included in a comprehensive yet readable manner.
- Transfer study proposal into IRB forms**  
Your local Institutional Review Board (IRB) must first approve any research (whether it is conducted on animals or humans) that you plan to undertake. To obtain this approval you are required to complete the IRB forms and comply with their requirements. However, this can often be a delicate process and require several documents to be submitted. Any unclear or missing information may lead to delay or rejection by the IRB. In this service, we offer guidance on how to complete the forms accurately by complying with the IRB guidelines.

A large red arrow points from the text of the third service to a red-bordered box containing the 'Order Service Now' button. Below this box are two other buttons: 'Customize and Select Services' and 'Save More With Bundles'.
