

## Course Specification Student Version

<b>Course Title:</b>	Clinical Oral Surgery -4
<b>Course Code:</b>	OMC 512
<b>Department:</b>	Dentistry
<b>Program:</b>	Bachelor of Dentistry
<b>College:</b>	Vision College in Riyadh
<b>Institution:</b>	Vision College in Riyadh
<b>Revised:</b>	July 2025

## A. Course Identification

1. Credit hours: 1 (0+0+1)
2. Level/year at which this course is offered: Level 10/Year 5
3. Pre-requisites for this course (if any): OMC 511
4. Co-requisites for this course (if any): None

## B. Teaching Methods

1	Clinical Session
2	Case-based learning

## C. Course Description and Objectives

### 1. Course Description

This is a clinical course during the 5th year. This course consists of pure clinical components in advanced oral surgery.

### 2. Course Main Objective

The main purpose of this course is to enhance the student ability to formulate a comprehensive treatment plan for patients requiring dental extraction. And to build their clinical skills to perform dental extraction of erupted teeth and remaining roots with varying degrees of complexity.

### 3. Course Objectives

**By the end of this course, students should be able to:**

- Analyze systemic medical conditions relevant to dental treatment and their implications for clinical management.
- Categorize dentoalveolar traumatic injuries and odontogenic infections and evaluate methods for their management.
- Evaluate patients' medical conditions, conduct clinical examinations, and diagnose odontogenic infections to guide treatment planning.
- Apply effective local anesthesia and perform non-surgical extractions with efficiency.
- Evaluate and manage complications associated with dental extractions.
- Integrate digital tools in the creation and documentation of comprehensive treatment and follow-up plans.
- Demonstrate ethics and professionalism in dental practice.
- Exhibit autonomy in problem-solving and clinical decision for dental patient care.
