4. Co-requisites for this course (if any): ENGL 101	

B. Teaching Methods

1	Lecture
2	Practical Session
3	

C. Course Description and Main objective

1. Course Description

The course is a self-integrated intensive English language program for high school graduates and intending students of Medicine and Dentistry. It emphasizes consolidating previously acquired language skills and promoting greater fluency and accuracy through real language use. It aims to develop more advanced language functions and communicative competences in the four language areas, with a supportive, practice-intensive component of grammar. It is designed in a way that bridges the gap between the general English studied in high school and the language requirements of the specialist studies students will undertake later.

2. Course Main Objective

The main purpose of this course to develop more advanced language functions and communicative competences in the four language areas, with a supportive, practice-intensive component of grammar.

3. Course Objectives :
By the end of this course, students should be able to:

- Inculcate the habit of reading English at the specific level.
- Stimulate critical and participatory approaches to reading
- Develop specific lexical skills
- Encourage the development of reading-related skills through anticipatory, inferential, skimming, scanning, graph-reading and processing exercises.
- Develop technical report writing skills
